MUSIC STREAMING APPS & SITES

What are they? 'Music Streaming Apps & Sites'

Music streaming apps allow people to listen to music on their devices. It gives users access to millions of songs and artists from around the world. Popular music streaming apps and sites include Spotify, Soundcloud, Apple music, Amazon Prime and Deezer. Music streaming allows children to listen to songs from around the world in a much easier and cheaper way. This enables them to showcase their talent which would have been very hard to do many years back.

Know the Risks

Explicit content

Explicit content is everywhere online, including in popular music. Children can easily access songs on Spotify, for example, that may have explicit or inappropriate language not suitable for children. It is also easy to erase searches so you can't see what a child has been listening to.

Adult themed podcasts

Many music streaming apps also offer the ability to listen to podcasts which can vary across any kind of topic, from business and health to comedy and relationships. Again, children could be exposed to content which is more adult themed or contains age-inappropriate language.

Chatting to strangers

Some music apps, like Playlist, want to make music a more social experience by finding others who share the same musical tastes and will allow users to join group chats where they listen to a playlist together in real time. This could open up your child to talking to strangers online.

Safety Tips

Use child friendly apps

Many music streaming services are made just for children. For instance, the Spotify kids app provides parents with control over what their children listen to and all the content is family friendly and fun for children to explore.

Turn off explicit content

Most of the major music streaming apps will provide the option to turn off explicit material to make sure the music is completely clean. Some services even offer an option to lock the content censoring settings with a password, so your child can't switch it back.

Implement privacy controls

Check the privacy setting of your child's app. Ensure that whichever app or site they choose to stream music, the settings are set to be private. This way they can only share the music they are listening too with friends and family and can't engage in conversation with strangers.

Offering Support

Explore apps yourself

If your child insists on wanting to use a music streaming app then be part of the journey with them. Take the time to understand which apps they prefer to use and why they want to use it. Find out how to use the app yourself and understand what they could be exposed to and how to ensure they get the most of it in a safe manner.

Regularly check-in

Have regular conversations with your child about what they are listening to and how they are feeling. If they do hear explicit music or content that makes them feel uncomfortable, let them know that they can always talk to you and discuss what they've heard and what it means.
